ICAS ENTERS RESELLER AGREEMENT WITH CONTINUITY CENTERS EXPANDING MARKET RESEARCH FOR DISASTER RECOVERY SERVICES

Long Island City, NY, August 13, 2010 – Interface Cable Assemblies and Services Corporation (ICAS) recently entered into a reseller agreement with Continuity Centers, a provider of flexible disaster recovery solutions, headquartered in Woodbury, NY. Founded in 1979 and headquartered in Long Island City, NY, ICAS designs innovative, customized, and secure infrastructure in data, voice, video, security and wireless.

By joining forces with Continuity Centers, ICAS can now protect its customers' businesses with Continuity Centers' flexible disaster recovery solutions. Bryan Daddio, Account Executive at ICAS, describes how his company will benefit from working with Continuity Centers, "ICAS and Continuity Centers came together to form a key alliance, so that we can provide customers with our core business of cabling services along with an additional product offering, making ICAS' position in the market even stronger. The disaster recovery solutions that Continuity Centers provides are first-class. We are very excited to work with Continuity Centers and are looking forward to helping protect our customers' businesses with their disaster recovery services as well as combining the strengths of Continuity Centers with our secure infrastructure and cabling services in data, voice, video, security and wireless."

Continuity Centers COO Gregory R. Tellone states, "ICAS is a trusted provider with strong relationships and proven expertise, which provides a strong channel for our service offerings, specifically into the government and educational sectors who require their providers to be on OGS contract. Working with ICAS is another step we've taken to broaden our reach within the vertical markets that ICAS has a solid presence in, allowing us to better outreach to businesses and agencies that require our services. Continuity Centers is very excited to be a valued resource of ICAS and looks forward to working closely with them."

About ICAS

ICAS remains a national leader in providing competitive turnkey network infrastructure designs and installations of wire and wireless networks, copper and fiber cables systems, security, CCTV, and data installations. ICAS has achieved its leadership position through insightful solutions in project management, consultation, development, and network certifications for its clients. The company serves global enterprise clients, among them the top 50 companies of the Fortune 500. Its customers cross many business sectors including finance, education, energy, government, health care, hospitality and retail, among others. ICAS' vision is to provide its clients with single source solutions in network infrastructure technology—from concept to delivery. For more information on ICAS, visit www.icascorp.com or call 800-247-5203.

About Continuity Centers

Continuity Centers is a provider of flexible business continuity and disaster recovery solutions. Headquartered in Woodbury, NY with recovery capabilities throughout North America, Continuity Centers is the only company within the United States to offer a one-click 60-second technology recovery solution, called Instant Business Recovery (IBR). Continuity Centers has dedicated itself to one goal: protecting its members and ensuring business as usual when they have a disaster. Continuity Centers received an exclusive endorsement in 2010 by the New York State Bankers Service Corporation, (a wholly owned subsidiary of the New York State Bankers Association) the only company whose disaster recovery services include such an endorsement. Since its inception in 1999, Continuity Centers has established a worldwide client base in various industry sectors including banking, construction, energy, healthcare, legal, publishing and many more. For more information on Continuity Centers, visit www.continuitycenters.com or call 877-499-2577.
