

A KEY SECURITY THREAT

AMBERBOX RESPONDS WITHIN 3.6 SECONDS, WITH AUTO 911 NOTIFICATION FOR FASTER POLICE ARRIVAL.

DETECT GUNSHOTS + INFORM LAW ENFORCEMENT + AUTOMATE THE RESPONSE

ADVANCED SENSING TECHNOLOGY

Detect Gunshots Faster

Immediate and precise indoor gunshot detection and notification in 3.6 seconds. Tri-factor authentication delivers maximum accuracy and protection from an active shooter threat.

AUTOMATE THE RESPONSE

Instant Notification To Law Enforcement

Automatic alerts to police via our E911 certified telecommunications platform and simultaneous notification to building security representatives. Reduce response times by an average of 5 minutes to stop threats faster.

REAL-TIME INFORMATION

Always Be In Control

Cloud-based AmberBox Response Platform delivers real-time data on rapidly evolving active shooter incidents. Monitor locations, track perpetrator movement and respond immediately with pre-programmed security features anytime, anywhere.

INDOOR GUNSHOT DETECTION

TRACK INCIDENT LOCATIONS IN REAL-TIME ANYWHERE

FOR SCHOOLS, BUSINESS AND GOVERNMENT

ONE-STOP SINGLE SOURCE TECHNOLOGY PROVIDER

For all of your business technology needs from security surveillance to project management services, cabling solutions and more.

A GROWING PROBLEM

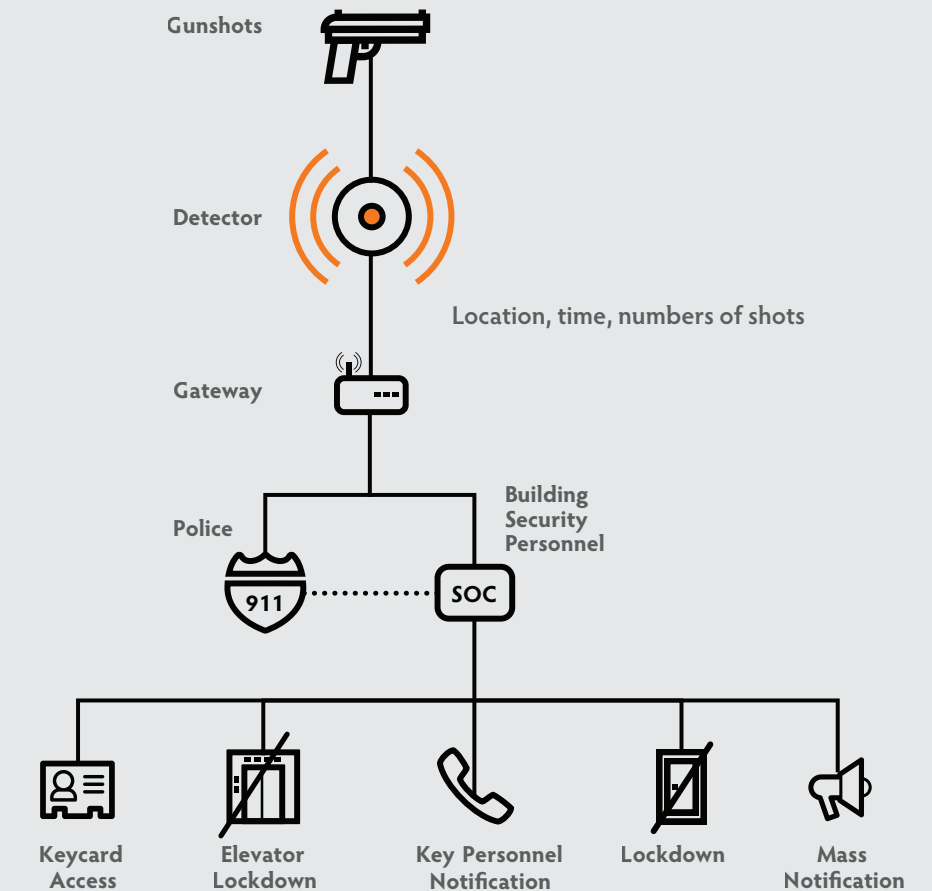

Gun violence is not only becoming more frequent, but deadlier. Preparation and training are crucial, but in an active shooter situation, the most important factor is a quick and accurate response. AmberBox technology provides gunshot location, movement of shooter, gunshot times and total number of shots fired. The AmberBox system is designed to distinguish between gunfire sounds and other loud noises to minimize any false readings.

PROTECTING LIFE THROUGH
INSTANT RESPONSE TECHNOLOGY

HOW AMBERBOX WORKS

1. AmberBox uses acoustic and infrared data to respond immediately following a firearm discharge.
2. The gunshot is verified utilizing our unique machine learning algorithm, instantly determining the firearm audio signature.
3. Detectors communicate an alert signal through a wireless MESH network to the building gateway.
4. Automatic gunshot alerts are sent to law enforcement via our E911 certified platform, with simultaneous notifications to building security. A conference call line is created to share information and coordinate efficiently.
5. AmberBox can immediately activate building security systems, such as access control, while alerting personnel with SMS, email and call notification. Real-time shooter location tracking can be viewed through the web or mobile response platform.

TYPICAL POLICE RESPONSE

When precious minutes can make a significant difference to attack severity, AmberBox Gunshot Detection enables first responders to arrive on scene faster, equipped with the vital information needed to contain threats and mitigate casualties.

THE RESULT

 <p>Patented Gunshot Detection Immediate and precise gunshot detection.</p>	 <p>Reduce Response Time Automatic notification to 911 and building security</p>
 <p>Response Platform Track incident locations and data in real-time anywhere-detection.</p>	 <p>Easy Installation No wired data connection, only a high / low voltage power supply</p>
 <p>Seamless Integration Universal integration with building security systems</p>	 <p>Privacy and Data Security No real-time audio transmitted, guaranteeing privacy</p>
